CAT FOOD RECALL NOTICE

A number of "Premium Edge" cat foods manufactured by Diamond Pet Foods are being voluntarily recalled due to low levels of thiamine (vitamin B1). There have been no illnesses associated with these products, but long term thiamine deficiency can include decreased appetite, salivation, vomiting and weight loss; and in extreme cases neurological signs.

If you have any of the affected lots, you can contact the company directly for pick up and credit.

See below for affected products:
