

Health & Wellness Care for your Cat

See our tips below for reducing the cost of veterinary care.

Cat Owners: Following are health & wellness services that we suggest for your cat along with related costs. Please contact us with any questions. Costs for specialized procedures or care specific to your cat will be provided to you separately and in advance of any procedures.

<u>Type of care</u>	<u>\$ Cost</u>
Exams	
Wellness (recommended twice annually nose to tail exam of cat's skin, eyes, ears, nose, throat, nervous system, digestive and cardiovascular systems plus oral/dental exam)	61 one cat 32/ cat 2 or more
Geriatric (cats over age 9, includes above physical as well as blood pressure check, mobility evaluation and comfort/pain assessment)	68
Medical (exam to determine cause of symptoms or illness)	78
Behavioral (determine possible sources of aggression, poor litter habits and other behavior issues)	149
Standard dental care (teeth cleaning, tartar removal & fluoride)	600-750
Vaccines (requires wellness exam during past month)	
Kitten vaccines (number of vaccines depends on kitten's age)	62-100
Adult cat rabies booster	24
Distemper	19
Feline leukemia	31
Early disease detection (non-urgent lab screening to check for thyroid, diabetes, liver and kidney disease; includes urinary tract evaluation and treatment plan when needed)	220-395
Spay (sterilization of female cats) Includes physical examination, pre-anesthesia blood work to screen internal organ function, monitoring and pain management.	381-440
Neuter (sterilization of male cats) Includes physical examination, pre-anesthesia blood work to screen internal organ function, monitoring and pain management.	185-240
Declaw (cost varies with cat's weight and age) Includes physical examination, pre-anesthesia blood work to screen internal organ function, monitoring and pain management.	450-780

SAVE money on your cat's veterinary care by following these tips:

- Bring in multiple cats for a discount on wellness exams!
- Spot illness early by becoming familiar with your cat's normal eating and litter habits.
- Get twice annual physicals to avoid more costly care later, especially in cats age 7 and older!
- Consider early disease detection to spot health problems before they become serious.
- Cat proof your home to prevent poisoning and injury. More tips at www.thecatpracticepc.com.
- Spay/neuter your cat to prevent certain cancers and prevent roaming and spraying.
- Brush your cat's teeth regularly with enzyme toothpaste to prevent tooth decay and gum disease.
- Feed your cat a good protein-based diet that contains no more than 7% carbohydrates.
- Brush your cat regularly to reduce build up of hairballs which can require surgical removal.
- Keep your cat indoors to avoid injury and disease.
